

END OF JANUARY UPDATE

2025 was a learning curve with the implementation of the TaRMS system by Zimra and after several observations we will be implementing some changes in 2026. For the 2026 tax year, Softrite will now be using the Averaging PAYE calculation method.

You will be able to change this calculation method on your Zimra TaRMS portal only at the beginning of the year.

To ensure you have the changes, please make sure you are on the **latest** version of the payroll which is available on our website [here](#).

If you have already run and paid your January payroll, please note that you will have to redo a pay generation on the new version and may have slight adjustments to your figures especially if you have irregular income or bonuses this month.

Please input the figures already paid out as advances and then pay the difference if there is any.

Weekly and fortnightly payrolls will not be affected but you will have to be on the new version moving forward.

ZIMRA TAX TABLES

Please also note that the same tax tables for 2025 for both USD and ZWG are still being applied, as ZIMRA has not yet released the official 2026 tax tables.

For your convenience, you can access the current tax tables directly [here](#).

We remain committed to providing exceptional service and value. Should you have any questions, please do not hesitate to contact our support team.
